

Plastic U Nut

Overview

Easy-to-install, lightweight plastic components cover a wide grip range and accept most common screw diameters.

Spring action and cut spacer ease assembly and help keep the nut in place.

Its unique design is patent-pending.

They are ideal for plastic with foam applications and any application that requires easy assembly and removal plus compatibility with recycling standards.

Features and benefits

- Made of polyoxymethylene (poly acetal) in accordance with standards for combustion levels and recycling
- Wide grip range; covers piece part thicknesses from 1.5mm to 5.3mm
- Accept 4mm, 5mm and 6mm diameter screws, including engineered threaded fasteners for plastics
- Different colors per part number help avoid part mixing
- Lightweight
- Easy installation
- High temperature resistance (more than 80^o C)
- Good pull-out resistance
- Good resistance to strip-out
- Ideal for use on plastics with foam
- Can replace metal cage nuts, U clips, J nuts and spring metal clips
- Compatible with automated screw installation tools
